PROFILE

Backend-focused Full-Stack Developer (2nd Year) skilled in building **production-grade applications**, real-time systems, and AI-powered platforms. Strong expertise in **Node.js, Express.js, MongoDB, Supabase, Redis, WebSockets, and microservice-style architectures**. Experienced in taking ideas from **zero → deployment**, integrating payments, authentication, cloud storage, and scalable backend systems. Passionate about building fast, secure, and high-impact features for startups.

EMPLOYMENT

FullStack Development Job Simulations, Skyscanner & Goldman Sachs ✎ 02/2025

- Built and deployed scalable backend services using Express.js, MongoDB & cloud integrations.
- Designed REST APIs, implemented third-party integrations, and optimized workflows.
- Used Jest, Postman & Atlas for testing and debugging.

Freelance Software Developer, Atrey.dev ✎ 2024 – Present

- Delivered 20+ full-stack projects using MERN stack and cloud services.
- Built secure backends, optimized database queries, deployed apps on Azure (VMs, Blob, Functions).
- Communicated with clients, managed requirements, and delivered production-ready software.

EDUCATION

Bachelor of Technology, ITM Skills University ✎ 2024 – 2028

- Specialization in MERN stack, full-stack web development, cloud services & DevOps fundamentals.
- Gained hands-on experience in API development, deployment pipelines & cybersecurity basics.

SKILLS

- | | |
|---------------------------------|-------------------|
| • JavaScript (ES6+) | • Express.js |
| • RESTful APIs | • Docker |
| • Netlify | • Supabase |
| • React.js | • Redis |
| • Azure (VMs, Blob, Functions) | • Socket.IO |
| • MySQL | • GraphQL (basic) |
| • Node.js | • MongoDB |
| • Firebase | • Postman |
| • Agile/Scrum | • Typescript |

PROJECTS

WINGAMES.CLUB - Real-Money Ludo Matchmaking Platform [↗](#)

Client Project | React.js, Node.js, Express, Supabase, Razorpay, Redis, Socket.io

- Developed a secure, real-time multiplayer platform where users join paid Ludo matches, share room codes, and submit game results via screenshots.
- Built real-time matchmaking using Redis queues and Socket.IO [↗](#) for smooth opponent pairing and low-latency gameplay.
- Designed a responsive UI and implemented admin tools for KYC approval, fund settlement, and dispute resolution.
- Demonstrated expertise in real-time systems, payment-ready architectures, and production-grade full-stack development.
- Integrated Supabase for authentication, wallets, KYC workflows, and match data management.

Examlytic - AI-Powered Exam Proctoring Platform [↗](#)

Personal Project (Built for Demo Days) | React.js, Node.js, Supabase, Socket.io, MediaRecorder API, PeerJS, MidPipe API, Lottie, CSS

- Designed and developed a full-stack online exam proctoring system for real-time student monitoring.
- Enabled live webcam streaming (PeerJS) and screen recording (MediaRecorder API), with secure uploads to Supabase Storage.
- Integrated AI-based cheat detection via MidPipe API to automatically flag suspicious behavior.
- Built an admin dashboard with real-time updates (Socket.IO) for invigilators to log and manage exam violations.
- Crafted a responsive UI using CSS and Lottie animations, ensuring smooth experience for students and admins.
- Presented during Demo Days, highlighting its scalability for remote exam environments.

PrepPal - AI-Powered Interview Simulator [↗](#)

Personal Project | Next.js, Tailwind CSS, Gemini API, PostgreSQL

- Developed PrepPal, an intelligent mock interview platform powered by Google's Gemini API to simulate real-time interviews and provide AI-generated performance feedback.
- Built a dynamic, full-stack web app using Next.js and React, ensuring fast rendering, responsive UI, and seamless user interaction.
- Implemented Drizzle ORM with PostgreSQL to efficiently log user interview sessions and enable structured data analysis.
- Demonstrated skills in AI integration, frontend/backend development, and real-world SaaS product architecture.
